## Controls and compliance checklist

To complete the controls assessment checklist, refer to the information provided in the scope, goals, and risk assessment report. For more details about each control, including the type and purpose, refer to the control categories document.

Then, select "yes" or "no" to answer the question: Does Botium Toys currently have this control in place?

## Controls assessment checklist

Yes	No	Control
	$\checkmark$	Least Privilege
	$\checkmark$	Disaster recovery plans
	$\checkmark$	Password policies
	$\checkmark$	Separation of duties
$\checkmark$		Firewall
	$\checkmark$	Intrusion detection system (IDS)
	$\checkmark$	Backups
$\checkmark$		Antivirus software
	$\checkmark$	Manual monitoring, maintenance, and intervention for legacy systems
	$\checkmark$	Encryption
	$\checkmark$	Password management system
$\checkmark$		Locks (offices, storefront, warehouse)
$\checkmark$		Closed-circuit television (CCTV) surveillance

<b>V</b>		Fire detection/prevention (fire alarm, sprinkler system, etc.)			
goals, and	l risk as	compliance checklist, refer to the information provided in the scope.  ssessment report. For more details about each compliance regulation, ols, frameworks, and compliance reading.			
	-	or "no" to answer the question: Does Botium Toys currently adhere see best practice?			
Complian	ce che	ecklist			
Payment (	Card In	dustry Data Security Standard (PCI DSS)			
Yes	No	Best practice			
		Only authorized users have access to customers' credit card information.			
	$\checkmark$	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.			
	$\checkmark$	Implement data encryption procedures to better secure credit card transaction touchpoints and data.			
	$\checkmark$	Adopt secure password management policies.			
General Data Protection Regulation (GDPR)					
Yes	No	Best practice			
	$\checkmark$	E.U. customers' data is kept private/secured.			
$\checkmark$		There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.			
	$\checkmark$	Ensure data is properly classified and inventoried.			

$\checkmark$	Enforce privacy policies, procedures, and processes to properly
	document and maintain data.

## System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
	$\checkmark$	User access policies are established.
	$\checkmark$	Sensitive data (PII/SPII) is confidential/private.
$\checkmark$		Data integrity ensures the data is consistent, complete, accurate, and has been validated.
	$\checkmark$	Data is available to individuals authorized to access it.

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

## Recommendations (optional):

The following are Administrative, Technical, and Physical (preventative, corrective, detective, deterrent) controls that the IT manager could communicate and recommend to stakeholders to be implemented to strengthen the security posture of Botium Toys and to ensure compliance best practices are met;

- Separate the duties within the company and create specific roles.
   (preventative)
- ensure that the roles of each employee are specifically defined and that the rule of Least Privilege is implemented with each role; giving each employee in their

- respective roles access to only the minimal amount of data necessary to complete their work tasks. **(preventative)**
- Encryption of PII and SPII information to ensure the confidentiality of internally stored data and deter possible internal and external threat actors. (deterrent)
- Strengthen password policy requirements to meet the recommended best practices; 8 characters minimum, a combination of letters with at least 1 number and/or special character. (preventative)
- Implement a Disaster Recovery Plan and create a backup of all internal data.
   (corrective)
- Install an Intrusion Detection System (IDS) to alert the IT team of possible security breaches. (detective)
- Manage the account lifecycles of all current and previous employees, reducing attack surface, and limiting overall impact from disgruntled former employees and default account usage. (preventative)
- Create a schedule to manually monitor and maintain the Legacy System to identify and manage threats, risks, or vulnerabilities to any out-of-date equipment and system components. (preventative)
- Locking the areas where network equipment and server systems are kept would bolster integrity by preventing unauthorized personnel and other individuals from physically accessing or modifying network infrastructure gear.
   (preventative)
